

- positive regulation of cell migration
- regulation of nervous system development
- cell-cell adhesion
- carboxylic acid transport
- regulation of cell junction assembly
- pyruvate metabolic process
- import into cell
- gliogenesis
- negative regulation of cell population proliferation
- Signaling by Rho GTPases
- Spinal cord injury
- regulation of endothelial cell migration
- negative regulation of amyloid-beta formation
- muscle structure development
- Nervous system development
- Proximal tubule bicarbonate reclamation - Mus musci
- regulation of small molecule metabolic process
- cell projection morphogenesis
- regulation of neuron projection regeneration
- regulation of smooth muscle cell proliferation
