

- regulation of cytoskeleton organization
- Signaling by Rho GTPases, Miro GTPases and RHO
- tube morphogenesis
- regulation of protein catabolic process
- Hemostasis
- regulation of nervous system development
- Focal adhesion PI3K Akt mTOR signaling pathway
- Cellular responses to stimuli
- plasma membrane bounded cell projection morphog
- Signaling by FGFR
- kidney development
- small GTPase-mediated signal transduction
- Autophagy - animal - Mus musculus (house mouse)
- membrane organization
- sensory system development
- relaxation of vascular associated smooth muscle
- enzyme-linked receptor protein signaling pathway
- Transcriptional Regulation by TP53
- protein localization to nucleus
- hematopoietic stem cell homeostasis
