

- Electron transport chain
- Cardiac muscle contraction - Mus musculus (house m
- memory
- gliogenesis
- Molecules associated with elastic fibres
- regulation of amyloid fibril formation
- maintenance of location in cell
- neuromuscular process controlling balance
- response to light stimulus
- eye morphogenesis
- Translation factors
- Mineral absorption - Mus musculus (house mouse)
- negative regulation of leukocyte differentiation
- Factors and pathways affecting insulin like growth fac
- membrane organization
- Regulation of Complement cascade
- forebrain development
- vacuole organization
- Asparagine N-linked glycosylation
- cellular response to copper ion
