

- positive regulation of cilium assembly
- Cellular responses to stress
- Autophagy - animal - Mus musculus (house mouse)
- proteasomal protein catabolic process
- G2/M Transition
- inner ear auditory receptor cell differentiation
- Dysregulated miRNA targeting in insulin PI3K AKT si
- myelination in peripheral nervous system
- regulation of GTPase activity
- hematopoietic progenitor cell differentiation
- Intracellular signaling by second messengers
- Chemical carcinogenesis - receptor activation - Mus r
- Generic Transcription Pathway
- Ether lipid metabolism - Mus musculus (house mouse)
- regulation of synapse organization
- cell differentiation involved in kidney development
- regulation of mRNA metabolic process
- supramolecular fiber organization
- Cellular response to hypoxia
- peptidyl-serine phosphorylation
