

- regulation of epithelial cell differentiation
- DNA-templated transcription
- cellular response to organic cyclic compound
- MAPK signaling pathway - Mus musculus (house mouse)
- response to growth factor
- response to mechanical stimulus
- Fc epsilon receptor (FCER1) signaling
- negative regulation of transcription by RNA polymerase
- regulation of lens fiber cell differentiation
- long-term memory
- ovarian follicle development
- negative regulation of erythrocyte differentiation
- Metabolism of RNA
- regulation of mRNA processing
- Cell cycle - Mus musculus (house mouse)
- regulation of DNA-templated transcription initiation
- TP53 Regulates Transcription of Cell Cycle Genes
- regulation of DNA replication
- muscle tissue development
- intracellular lipid transport
