

- Fatty acid metabolism - Mus musculus (house mouse)
- Carbon metabolism - Mus musculus (house mouse)
- response to growth factor
- Fatty acyl-CoA biosynthesis
- Neutrophil degranulation
- carboxylic acid transmembrane transport
- PPAR signaling pathway
- aerobic respiration
- response to tumor necrosis factor
- modified amino acid catabolic process
- import into cell
- cell projection morphogenesis
- Lysosome - Mus musculus (house mouse)
- Focal adhesion PI3K Akt mTOR signaling pathway
- photoreceptor cell maintenance
- positive regulation of bone mineralization
- cellular response to hormone stimulus
- extracellular matrix organization
- response to insulin
- Hemostasis
